Montréal, August 8, 2003

To whom this may concern.

I hereby confirm that I have known Alain Quesnel for several years now. I first met Alain when he joined the Montréal Delphi user group (group that I first organized in 1996). Since then, I observed and appreciated his ability to quickly learn and convert to the career of computer software developer. When he came back from a one year contract in California, I hired him as a Delphi instructor for our Delphi classes at the CRIM in Montréal. Since then, he is my main instructor for the Delphi language. He has the ability to understand a given subject, and to teach and present it in a simple way. To be able to do this proves his thorough understanding of that subject.

Feel free to contact me if you need further information about Alain Quesnel.

Ludovic Dubois,
President
Pretty Objects Computers Inc.
